

CLAIMS

What is claimed is:

1. A base station having a plurality of sectors, the base station comprising:
means for generating a signal comprising a plurality of frames; and
means for transmitting the signal in each of the plurality of sectors,
wherein the means for transmitting makes frame transmission timings different
between the plurality of sectors.
2. The base station as claimed in claim 1, wherein the means for
transmitting transmits the signals by using a plurality of channels, and makes frame
transmission timings different between the plurality of channels.
